197 SUGAR STICKS WILL NOT (CURE COUGHS.—It is my belief that many of the puffed cough candies of the day are mere sugar candy. To relieve or cure a cough or cold, we must embody medicinal remedies in the pleasant form of candy; the best way to judge whether these puffed candies are real remedies, is to say to the owners when you buy it, if this don't prove all you say, will you return the money? These are the terms on which Jones' Cough Candy is sold—we willingly return the money to all who buy it, unless it proves all stated; and we warrant that it will always relieve, and eiten effect a permanent cure in cases of coughs, colds, hoarseness, splitting of blood, whooping cough, asthma, and all pulmonary complaints. Just try one shilling's worth—It is sold at from one shilling a large package, by T. Jones, sign of the American Eagle, 92 Chatham street, N. (17-TO ALL THE WORLD WHO USE LEATHER IN ANY FORM,—Oil of Tannin, or leather restored. A new chemical discovery. Most people know that skins and hides are converted into leather by the use of tannin extracted from certain barks, &c.

When the force and strenth of the tannin is worn out, leather becomes dead, hard, dry, brittle, cracked covered with a cruet, &c. This all know. To restore, then, life, softness, moi-tness, strength, smoothness, and remove all crust, fly, or blister—restore the tannin. This substance the leather never can receive the second time; but the whole virtues of it are in this article, the Oil Tannin—which penetrates the stiflest and hardest leather, if it has been twenty years in use; and if it tears easily with the fingers, it imparts at once a strength that is utterly incredible until seen. It becomes like new leather in all respects, with a delightful softness and polish, and makes all leather completely and perfectly impervious to water—particularly boots, shoes, carriage tops, harness, hose, trunks, and in fact all things made of leather, giving a splendid polish, even higher than new leather has, and at least doubling its wear and durability, in whatever manner the leather is used. These are facts.

GG—CURE OF LIVER COMPLAINT—

New York, Nov. 6, 1841.

Mr. H. G. Daggers—Sir, In justice to the efficacy of Dr. Rush's intaillible Health Pills, one box only of which 1 purchased from you, I deem it but right to inform you of their surprising effects in restoring me to health. For the last two anoths I was disabled from my employment, tried numerous stretised remedies, was treated in the general hospical, without any success, and finally adopted Dr. Rush's Fitls. Their effect was immediately evident intuiting vigor and health through ray frame, relieving a constant pain in my side and deep oppression, promoting sleep, creating an appetite for food, and altogether invigorating a frame that was rapidly sinking inte decay. I therefore deem it a duty I owe, not only to the public, but yourself, to publish the above testimony, which I have corologated with a conscientions affidavit of the truth PATRICK GALLAGHER,

(17) A CHANCE FOR A VARIETY OF CURES:—If you have a bad cold, try Dr. Feters' Cough Lozenges, they are the most effective medicine at such a time in driving off all coughs, inflammation of the lungs, asthmas, croup, and all diseases of a similar nature. The public appreciate their value, and they should be tried in all cases springing from chills and colds. Dr. Peters' Cathartic or Health Lozenges, when the stomach is found out of order completely restore it to a proper state, dissipating dyspepsia, bilious attacks, &c. as effectually as any medicine in the world. The Cordial Lozenges are formed of such materials, as will destroy a headache, low spirits, lassitude, weakness, and general dyspepsia, that in many cases lead mankind to suicide. The Worm Lozenges, intended as a cure to a variety of complaints which afflict children, cannot be too strongly recommended. Principal office, 125 Fulton, corner of Nassau street.

07- THE FORCE OF HABIT - Habit is a wonder GF THE FORCE OF HABIT—Habit is a wonderful thing in many ways; some people who have taken Pease's Clarified Essence of Horehound Candy for the cure of a cough, like it so well, that from habit alone they continue its use; the consequence is, that they experience neither colds or chills in the system. So much for the force of habit. If you have a cough, cold, asthma, or lung complaint, or in fact any pulmonary disease that tends to wards consumption, Pease's Horehound Candy is found to be the most certain and effective remedy that has been invented for ages. There is now no reason why people should be precipitated into consumption as long as such a remedy is at head. It will be found certain and effective in the cure of all pulmonary complaints in their first stages. It is sold at 45 Division street, 10 Astor House, 110 Broadway, 86 William street, and 232 Broad street, Newark, N.J.

Something New.—Pease's Orange Cream Candy.—We have received from our Horehound Candy Manufacturer, Pease and Son, 45 Division street, a specimen of their Orange Cream Candy; it possesses the most delicious fisvor of any Havanna Orange we have tasted; it will be a great favorite this winter with the ladies. "Sweets to the ——"" the proverb somewhat—." Is it not!

Gewett Feet.—It should be remembered that colds, coughs, consumption, asthms, inflammation of the lungs, pleurisy, and many other fatal disorders, are often the result of catching cold, in consequence of wet feet, damp clothes, night air, &c.

Wright's Indian Vegetable Fills are undoubtedly the best medicine in the world for carrying off a cold, because they purge from the system those morbid humors which, when lodged in the various parts of the body, give rise to every maindy incident to man. A single 25 cent box of said Indian Vegetable Fills will not always afford rehef, but will in a majority of cases make a perfect cure of the most obstinate cold—at the same time the digestion will be improved, and the blood so completely purified, that all cvil consequences resulting from catching cold will be entirely prevented, and the body restored to even sounder health than before.

BEWARE OF COUNTERFEITS—The public are respectfully informed, that the medicine purporting to be Indian Fills sold by Mr. Richard Dennis, former clerk in the office, are not the genuine Wright's Indian Vegetable Fills. The only security against imposition, is to purchase from none except advertised agents, or the offices devoted exclusively to their sale, 288 Greenwich street, New York; 193 Tremont at Boston; and 169 Race street, Philadelpping.

Remomber, no medicine is right, except Wright's Indian Vegetable Pulls.

197 THE LOCK HOSPITAL IN PARIS, UNDER the distinguished management of M. Ricord, is one of the best conducted establishments for vinereal patients in the world. All the new remedies for the cure of these terrible affections, have been introduced with great success. Encouraged by the fortunate results of M. Ricord's modes of treatment, the same remedies have been prepared under the direction of the College of Medicine and Pharmacy of the city of New York, and are to be had at their principal office. The "Parisian Alterative Mixture," for the cure of all forms of syphilis, whether primary or secondary, is sold at \$1\$ per bottle, and in cases of half-a-dozen bottles, \$5. Tuesday, Dec. 13-6 P. M.
The business at the board has been moderate this morn-

ing, and prices were generally worse. Ohio 6's gave way ½ per cent; Mohawk ½; Harlem rose ½. The agency of the celebrated Southern Life and Trust Company has taken "moonlight flitting," and retired to

make application.

The Auburn and Rochester Railroad have declared a dividend of 5 per cent, payable on the 3d January, at the Bank of the State of New York in this city, and also at the office of the company, at Canandaigua, on the 3d

the Covernor of Indiana, in relation to the affairs of that state. The treasury notes, or state scrip, which form part of the currency of that state-he states as follows in rela

of the currency of that state—he states as follows in relation to them:—

"In the year 1839,the legislature, for the purpose of paying contractors on the public works, authorized an issue of treasury notes to the amount of \$1,500,000. The notes formed a very considerable part of our circulation, and passed at par until about 7 months since, when they suddenly depreciated in value between forty and 50 per cent. At that time there were over \$1,000,000 of these notes in circulation, and the immediate effect was not only to leave in the hands of the community a circulating medium that answered but few of the purposes of money, but was also equal to a clear loss to the people, by this sudden depreciation, of nearly half a million of dollars."

He then recommends that these notes should not be reissued when received into the state trensury.

reissued when received into the state treasury.

"Very many of our citizens are indebted to the state in various ways, and on account of various funds, and after looking over the whole grounds, and viewing the embarrassments to which we must be subjected until the treasury notes are all redeemed by the state, I can see no better plan than to make them receivable for all state dues, as far as it can be done. If the state will not receive money of her own creation for her own dues, she cannot and ought not to ask the people to give it that credit as a circulating medium which she refuses to accord to it."

A memorial of the citizens of Gincinnati has been ad drossed to the Legislature of that state, in relation to the currency of the state. After setting forth the evils they suffer from the vile issues of the banks, they propose an enforcement of the laws, viz: to collect the revenue of the state in gold and silver, instead of taking the promises of asso-

in gold and silver, instead of taking the promises of asso-ciations, and for the taxes due the state to receive nothing but constitutional money. They remark as follows:—

but constitutional money. They remark as follows:—

"The total revenue of the state, annually, will be about one million of dollars. And if this sum, in a metallic medium, could be circulated throughout the state, it would not only suffice for the payment of taxes and tolls, but perform at least one-third of the entire functions of our currency; for it would be at least that proportion of the circulation. It would exempt that proportion of the industry and commerce of the state from the fluctuation and loss which have hitherto wasted the wealth and blasted the hopes of the people. It would give stability to property and confidence to labor. It would restrain the expansion of banks, without diminishing the medium of exchange.

"The collection of the revenue of the state in gold and silver, is demanded by the equality of our political rights; for inasmuch as the promissory note of the farmer or mechanic is not receivable for public dues, neither should be that of the banker."

These propositions are ably supported by facts and ar-

These propositions are ably supported by facts and arguments. They then demand that banking should be allowed to expire with the charter of the banks, susallowed to expire with the charter of the banks, sus-taining their demand by a strong array of facts and able arguments. This is the true course. It is an undoubted fact, that a large majority of the people of this country are opposed to banking, and yet banking is imposed upon them by the activity of a few bankers, through the pas-siveness of the people. It is an undoubted fact, that in siveness of the people. It is an undoubted fact, that in this country, the active party, it it is ever so small, always attain their objects, because they are not systematically opposed. This is seen in the fact that a mere handful of manufacturers succeeded in imposing upon the country a ruinous tariff, under which commerce, trade, agriculture and the revenue are all perishing. They had a constant stimulus in their own pecuniary benefit, which sustained their exertions. So it is with bankers and speculators. These cliques always prey upon the masses of the people, and always will do so, until the people arouse themselves, and firmly determine never to allow of any law which confers any exclusive privileges allow of any law which confers any exclusive privileges upon any set of men, on any pretence whatever. If the Ohio people persevere in the movement they have made, that State, at least, will be free from aristocratic op-

purchases of American produce by her, and the proportion of her manufactures taken by the United States in payment, we have compiled the following table, showing the quantities and value of cotton exported from Great Britain in ten years, the proportion sent to the United States, and the quantity of raw cotton imported from the United States for the manufacture of those goods.

In 1831, under the Cotton import d fm U. States Pounds, 219,756,753 237,566,758 269,203,075 221,455,812 229,615,692 2326,651,716 431,437,888

Here is a very curious table. In 1831, under the highest tariff ever imposed, the United States imported over 68, 600,000 yards of cotton cloth, at an average value of 18 cents per yard. This was 16 per cent of all the cotton manufactures of Great Britain, and bore a duty of about 35 per cent ad valorem in the United States. Under the descending scale of duties, the imports decreased until 1835—6, when the duty was diminished 4½ per cent, and the paper expansion here raised the import to 74,000,000 of yards. In 1840, when the duty had been further diminished 9 per cent, 32,073,000 yards were imported at an average value of 12 cents—the quantity being 4 per cent only of British manufacture. Here was a reduction of 6 cents per yard in the price, and of 3½ cents in duty; and yet the quantity imported fell off 50 per cent, while the purchases of raw material from the United States more than doubled! What agency had the tariff in this matter The average of the three years, 1831-2-3, of high duty compared with the years 1838-9-40, of low duty, is as follows:-

Average import, 1831-2-3 48,412,812 1,651,335 16 cts. 6 cts. 1838-9-40 35,931,055 1,083,151 15 33,4 12,478,786 568,191 1 " 21/2 "

Here is, under a descending tariff, a diminution of 25 per ct. in the quantity imported. At the same time, accor-ding to the best authorities, the manufacture of cotton in this country more than doubled, and amounted, in 1846, according to the census, to \$46,000,000 annually in value, against an average of \$5,000,000 imported in three years of the lowest tariff. These are official facts, and yet the manufacturers say their business was going to decay under the low tariff, and a venal press not only !reiterated such statements, but have not hesitated to circulate statements that 200,000 hands have received employment since the

late tariff went into operation. Sales at the Stock Exchange. Sales at the Stock Exchange.
